

Christine Mavrommatakis

A highly skilled Data & Analytics Specialist with an MSc in Applied Statistics and over 15 years of experience in data analysis, visualization, and business insights generation across diverse industries. Proven expertise in extracting, transforming, and integrating data from multiple sources to create actionable insights. Adept at leveraging tools like Power BI, Power Query, DAX, SQL, Python, and Snowflake to deliver data-driven solutions. Strong experience in cross-functional collaboration, process optimization, and leading data-related projects. Passionate about driving business value through advanced analytics and data visualization. Fluent in English with a solid understanding of business needs and the ability to communicate complex insights to non-technical stakeholders.

EXPERIENCE

Nespresso, Barcelona - Data & Insights Analyst

July 2022 – Present

Act as primary liaison with global markets and zones to understand and address their data & insights requirements.

Develop and maintain robust ETL processes to extract, transform, and integrate data for analytics, dashboards, and reports.

Create interactive dashboards and insightful visualizations using Power BI, addressing market-specific KPIs, campaign effectiveness, sales performance, and customer behaviors.

Ensure data accuracy and consistency, performing regular quality checks and enhancements aligned with business needs.

Lead complex analyses to guide strategic business decisions, communicating insights clearly to stakeholders across various business functions ensuring alignment with business objectives

BlackRock, Budapest — *Business Analyst*

January 2018 – December 2020

Managed and executed data-driven projects collaborating with cross-functional IT and engineering teams to clarify and implement analytical requirements.

Conducted gap analysis, documented business processes, and optimized workflows enhancing efficiency and productivity.

Created comprehensive training materials and user guides, conducting training workshops to drive adoption and proficiency.

Coordinated user acceptance testing (UAT) phases, ensuring robust data quality and accuracy in new analytical tool implementations.

DIAGEO, Budapest — *Central Statistical Forecasting Analyst*

November 2016 – December 2017

Developed multivariate statistical forecasting models enhancing forecast accuracy by integrating sales, price, and marketing activity data.

Implemented rigorous data quality checks and root cause analysis to identify and address discrepancies in forecasted vs. actual sales

Taquigraf Serra 1, Barcelona

Nationality: Greek

(0034) 629218234
